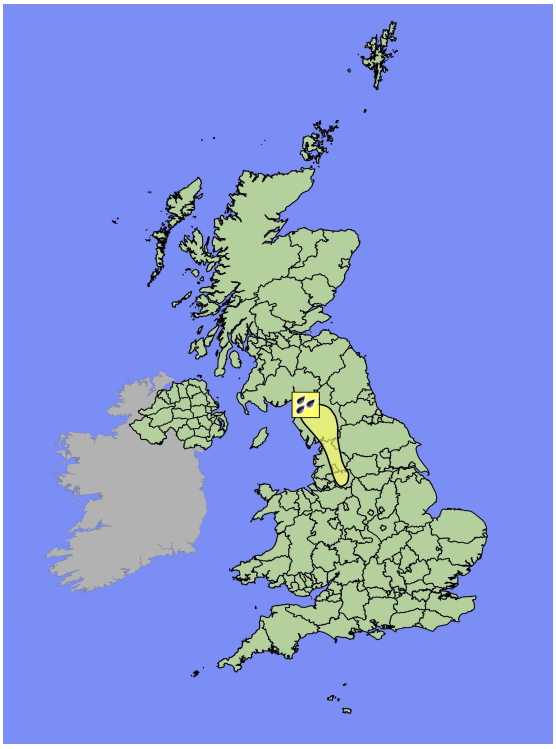
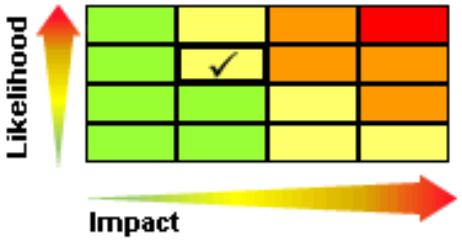
National Severe Weather Warning Service





Chief Forecasters Assessment
Rainfall totals of 20-40 mm are expected quite widely with isolated 60 mm totals in prone locations. It is these relatively large totals combined with the fact that the ground is relatively saturated that brings the flooding risk.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **00:00 on Wed, 12th Oct 2011** until **18:00 on Wed, 12th Oct 2011**

Prolonged and at times heavy rain are expected during Tuesday night and Wednesday morning across parts of northwest England. The public should be aware that this brings a risk of some very localised river flooding.
